Clear strip

for sensitive or dry skin

Our Clear strips feature a hypoallergenic, flexible and non-porous material that makes them easier to remove, making them suitable for dry or sensitive skin.

How to apply

Clean the skin

The adhesive won't stick properly to wet, oily or moisturised skin, so wash and dry your nose before applying.

Size matters

No, really. Our strips come in different sizes, and sensitivity levels, making it easy to determine which strip is best for you.

Position is everything

Place the adhesive side of the strip right above where your nose/nostril flares out.

Breathe easy

Gently rub the strip to secure it into place on your nose. Take a deep breath. Better breathing begins now.

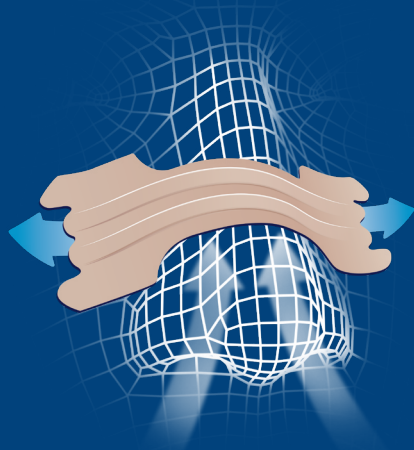

To remove

Wash your face with warm water for 10 seconds, then gently lift each side of the strip and remove. Ta-da!

Size matters, get it right!

All noses differ in size. Choose between our Small/Medium or Large nasal strips to find which works best for you.

Breathe Right® Nasal Strips are uniquely designed with flexible springlike bands that gently lift & open your nose/nostrils for improved nasal airflow helping you breathe more easily.

Breathe Right® can be used anytime you want to breathe more easily through your nose while exercising, sleeping or anytime throughout the day or night.

It's gentle on the skin for both adults and kids 6 years and over. Can be worn day or night for up to 12 hours, is easy to use and is drug free.
